- Provide guide, support to other team members

07/2014 – 12/2015 **Wealthy Chain Limited**

Fullstack Web/Hybrid App Developer

Wealthy Chain Limited (WCL) is a startup company in Hong Kong. At here, I have worked as remote, participate in team building own framework which to build things like CMS, hybrid mobile application for clients. We built any things based on NodeJS/ExpressJS, Ionic/AngularJS. Our clients from Singapore, so my communication skill in English is enhanced.

- Build core our framework based on NodeJS/Express JS, AngularJS, jQuery
- Guide team members about get familiar with NodeJS, AngularJS and our framework
- Developing and maintain all functionality of websites
- Review and ensure quality of code
- Participating in discussions with clients and Product Manager to clarify requirement
- Providing technical support to end users
- Design database schemas, write SQL query (on MySQL) and NoSQL query (Mongo DB) and keep things responsive from the server side
- Support team members for resolve all issues in working process

06/2015 – 12/2015 **XQBator**

Fullstack Web Developer

XQBator is US company with an product is NetObjex. NetObjex was founded by an eclectic group of individuals from multiple disciplines including software engineering, hardware engineering, product

management, sales, and marketing. At here, I have built Admin Panel, RESTful API for management user, beacon, device, device command, campaign event ...

- Build core AP based on Laravel 5 framework
- Build RESTful API based on Loopback.IO (NodeJS)
- Guide team members about get familiar with Laravel
- Developing and maintain all functionality of websites
- Review and ensure quality of code

03/2013 – 10/2013 **Snipdesk Software**

Node.JS developer

Development HMVC Web Application on top of Express JS with MongoDB and Redis

Projects

2016 **ActivityRez**

It's one integrated platform for Entire Travel Company based on PHP (Phalcon), NodeJS, AngularJS 1/2.

- With ActivityRez you can manage all of your sales channels in one place.
- Connect with resellers.
- Process direct bookings, in person and on your website.
- Track sales from affiliates and manage payouts
- Imagine how much time you'll save

I'm a technical leader in this project

Address: <https://staging.activityrez.com>, <https://staging.activityrez.com/pos2.7/dist>

2013 **BoxApp – An advertise product of Admicro's Adnetwork**

It's an website application based on PHP with framework CodeIgniter with some functionality:

- Manage some rich ads type with more size as 300x600, 300x385, 300x250 and more formats as PR, Video, Embed, Contact Form ...
- View report by campaign/banner/budget and export
- Manage sale/user account with budget/payment

Address: <http://boxapp.admicro.vn>, <http://adnetwork.admicro.vn/box-app>

I'm a technical key of this project.

2014 **IO Project – An internal product for Jupiter Group**

It's an website application based on NodeJS/Express JS for Jupiter Group – a worldwide logistic service provider with more modules:

- WUMP (Web User Management Platform): manage user/role by company/branch
- TCRG (Teckys Customization Report Generator) is a print customer with more custom like paper size, orientation, margin, alignment .. and export to pdf for print or send by email
- DCBS (Document Centric Business System): it's main purpose of this project. It have some feature as Template Designer, Document Designer, Workflow Designer, Report Designer. It used to design form for user with input, table, controls. Each input/controls or table can relation by define formula like excel. So it will easy for create any form for any purpose. In this project, we use for create some form for logistics service: AR, JM, AP, GL.

2015 **Gluoon Project**

This project is about make an panel for user. It's based on top of ExpressJS with MongoDB and Redis. User can create any sub application in this panel. We have built an sub application about chat (application module can create and integrate easy). With chat application, it's realtime application. User can create an topic, after that invite friend or any user into this topic and make conversation with more tools like emoticon, send video/picture, create pools ... And at this project we have built in mobile app version, notifications, API and embed for integrate to website/mobile hybrid application. At this moment, we have integrate notications/embed with partner Escortnet with product is SchoolBus (we are also building).

Address: <http://gluun.wocom.com>

2015 **SchoolBus Project**

It's an system with website and mobile app (Android/iOS). A school bus company has a fleet of school buses and drivers that pickup the students and send them to their school at various locations. Due to increasing demand of efficiency and parents/guardians concern of the children's safety, a mobile application would provide better visibility and control.

The objectives of this project are:

- A website for the School Bus Operator to manage the bus, drop-off/pickup points, setup trips, view trip status.
- A website for the School Admin to manage the class/student, view the trip status of each student.
- A mobile app for the parents to view the trip status of their child(s).
- A mobile app for the school bus driver or assistant to view the trip status, send reminder and confirm student onboard/alight
- Ability for the operators, drivers, parents, and students to send notification/request to each and acknowledge if necessary.

This project based on top of Express JS and Ionic Framework with MySQL and some technology as GPS, NFC (Near field communication), QR Code ...

Address: <http://sba.wocom.com>

2015 **NetObjex Admin Panel & Backend API**

It's admin panel and backend API of IoT project name NetObjex. Admin panel based on Laravel 5 and backend API based on Loopback StrongLoop.

- Management user/role
- Management drone project
- Management beacon, device, beacon set, location, feed, schedule, command ...
- Management marketing: surveys, ad campaign, beacon campaign, beacon notification

2016 **ClinicalTrials**

The "[ClinicalTrials](#)" web application product is for customers who are biotech investors. It should present "clinical trials" public data (from <http://clinicaltrials.gov/>) along with additional information provided by Scopic Software in visual way (gantt view/bar chart view) providing simple and intuitive interface for customers with accent on biotech companies, companies' drugs under clinical trials and drug clinical trials [phase](#)'s success.

It's based on NodeJS/ExpressJS and AngularJS.

2013 **InAdmicro – A small social network for Admicro**

It's a small social for internal Admicro based on PHP with framework CodeIgniter. Where any people can update all new information in company, exchange information/document, receive document/case study of all product in company. I'm a teamleader in this project.

2013 **Senseful.me** – <http://senseful.me>

SensefulME's centralized utility app allows your consumers to respond instantly, with a one-stop channel that lets them track their progress. This helps them promptly flag up issues, actively co-create with your brand to shape products and services, and enjoy the ride, all through a gamified, empowering environment. In this project, i have development feature of php site and make backend api based on NodeJS for analysis data get from wifi AP for get location of customer device.

And more wordpress/small site for customer ads campaign or freelance project e-commerce based on OpenCart/Prestashop/Drupal/Zend Framework ...

Skill & Background Knowledge

Computer skills

Languages	PHP, NodeJS, AngularJs, HTML/CSS, C++, C#, Java
Development Tools	Object-Oriented Analysis & Design (OOAD)
Methodologies	Prototyping Approach
Environment	Microsoft Visual Studio
	Git/SVN (Version Control)
Software	IntelliJ IDEA, WebStorm, PHPStorm, Navicat Database Management, Sublime Text
Systems	*Unix, Windows
Databases	MySQL, PostGreSQL, MongoDB, Redis, CouchDB, Oracle

Communication skills

Have a good ability in ideas presentation/explanation.

Very good team-work skills.

Friendly, sociable.

Ability to bear under high pressure of tasks.

Hard working and self-motivated

Languages

Vietnamese	Mothertongue
English	Good

Interests

- Music & Cooking
- Photograph
- Social Activities
- Reading novel and detective story
- Travelling
