Profile:

I'm Technical Architect and full-stack developer, hands-on developer over 5 year's experience working on a variety of projects from conception to release. I have a passion for develop new products, feel happy when my products is useful and used by many users. My approach is create a product that will be used by over 1.000.000 concurrent users and to be a good manager. I am a confident communicator and am comfortable working either independently or as part of a team with highly responsibility.

In 10-2015, I was lead team Windeliv win 2nd place over 450 contestants team at "Hackathon – Job search innovation" held by VietnamWork with product named CBOX. CBOX is an AI - a career assistant, using machine learning and natural language processing to ask and get information of users through chat and create CV for them.
