Now

Front-end developer

I have a chance to join the team that create the hybrid application. This project is an application to manage the assets of the company. In this project, my team choose Cordova, Angularjs, Ionic as the main programming language.
I have been taking part in the project to create the azure chatbot, configure the chatbot and publish it to the skype to test. I tried to use some exciting features of the chatbot, created the cognitive services of the chatbot.

OBJECTIVE

Seeking position of a Front-end Developer where I would apply my knowledge to complete my job successfully.
Besides, friendly working environment can boost my productivity.
