Role: **Developer and Leader**

Member: 3 persons.

Environment: Xcode.

Description: order food for restaurant. Those app have many functions such as: view menu, checkout product, update product, edit product, search Product, history order, view order, print bill, bill management...

Responsibilities:

- o Objective-C languages.
- o xml, SQLite, SOAP.

- o Integrated all these technologies in the iOS (AutoLayout, MultiThread, AFNetworking, Customize UI, connect printer with iDevice,)

3. Now, I am a Senior Developer of many projects at Pyramid Consulting company (PYCO GROUP) (From 9-2015)

Project: Tapptic.

Role: Senior iOS Developer

Member: 15 persons

Environment: Xcode

Description: Build and develop new feature, optimize and fix bugs many projects in Tapptic team.

Responsibilities:

- o Objective-C and Swift languages.

- o JSON, SQLite, Core Data, Auto Layout,

- o Integrated all these technologies in the iOS (AutoLayout, MultiThread, Streaming, handle to upload/download files, AFNetworking, Play media in background and handle remote control by headphone)

Project: tvOS HDViet

Role: Senior iOS Developer

Member: 1 persons

Environment: Xcode

Description: Build and develop new feature, optimize and fix bugs.

Responsibilities:

- o Objective-C languages.

- o JSON, SQLite, Auto Layout,

- o Integrated all these technologies in the iOS (tvOS SDK, AutoLayout, MultiThread, Streaming, handle to upload/download files, AFNetworking, Play media in background and handle remote control by headphone)

4. Experiences as a Leader and Developer while studying at University of Science

Project: London 2012

Role: Leader & Developer.

Member: 2 persons

Environment: Xcode

Description: Develop a program to update information, view schedule, view TV online the competitive sport of Olympic 2012.

Responsibilities:

- o With Objective-C language.

- o xml, SQLite

- o Integrated all these technologies in the iOS, illustrating it.

Project: HCMC mapping service

Role: Developer, tester.

Member: 10 persons.

Environment: Visual Studio 2010.

Description: Build HCMC map service (find path / shortest path, find locations, search by service, smart search)

Responsibilities:

- o MVC3 with JSP language, JQuery, Ajax, CSS.
- o SQL Database.
- o Integrated all these technologies in the website, illustrating it.

Project: Game “Legends of dragon”

Role: Developer

Environment: Visual Studio 2008 + XNA 3.0

Description: Build **Game “Legends of dragon”**.

Responsibilities:

- o Photoshop, cool edit pro, camtasia
- o Integrated all these technologies in the XNA, illustrating it.
- o This project is continue developed

And more projects:

- o Ajax chat application.
- o A few Mobile Game with C++, j2me, iOS.
- o Dictionary and Paint on mobile.

HOBBIES

- Playing table tennis, badminton, volleyball, football.
- Singing
- Gaming
- Listening to music
- Travelling
- Reading
- Science Research
