## Objective

Become a world-class software engineer, working with talented people.

## Summary

+5 years of experience in Web technologies. Proficiency with AngularJS 1, React, ES6, Node.js

## Experience

### Full-stack developer, FPT Software

2014-now

#### Responsibilities

- Build project skeleton, create reusable components, define coding convention
- Propose best practices, write guidelines
- Review code, make it clean
- Train people on new skills (Ex. Angular, high performance web apps)
- Analyze requirement, create mockup to get customer confirmation

*Projects worked on:* DirecTV ACM, DirecTV IPGenie, DirecTV MMT, AT&T CEMP, AT&T OPBB, DataCom OneVision Portal

#### Accomplishments

- Exceeded manager's expectations
- Got 100 CSS point

### Freelancer

2012-2016

#### EIStrabo Project

Vehicle management, route management and GPS tracking system. It provides real-time tracking vehicles by storing sensor data via TCP socket

#### Accomplishments

- Acted as solo developer, do everything from designing to deployment.
- Mastered javascript stack: node.js, sails.js on server side, angular.js on client side, gulp build system

#### Fall River Flowers Project

An ECommerce website for selling flowers.

#### Accomplishments

- Migrated existing UI to modern design
- Upgraded existing libraries to latest version

#### Pulprat Project

A social network about images sharing. User can upload their pictures and apply

effects... Users can interact with others by using comments, votes, sharing

## Side Projects

Aug 2016

### Doctors in a box

A Rails application helps to bring doctors closer to patient with main features:

- Tracked user actions & use that data for recommendation service.
- Real-Time chatting using Rails 5 ActionCable.
- Real-Time Communications using WebRTC

#### Accomplishments

- Started using Rails 5 to build a real application
- Was recognized as top 3 projects at [CoderSchool](#) Demo Day

### Birthday Card

A pure javascript application helps to create birthday card automatically based on image template and employee data

#### Accomplishments

- Built one-page, rich UI interactions application without using any framework
- Gained knowledge about SVG specifications for generating template

## Education

### FPT University

Software Engineering — 2010-2014

### Certification & Training

- AWS Certified Solutions Architect - Associate
- Scrum.org (Professional Scrum Master I)
- Udacity (Browser Rendering Optimization)
- Udacity (Javascript Design Patterns)
- Third prize in Information Technology Subject in the contest for selection of National Good Students in 2009 and 2010
- Silver prize in 30/04 Olympiads in 2008 and 2009

## Skills

- Javascript stack: NodeJS, AngularJS, SailsJS, solid Javascript Core
- Java Spring
- Restful webservices
- AWS Services
- Rails
- Design patterns
