Curriculum Vitae

Summary:

I have more than 10 years experience with software development, since 2012 up to now I have been working as **senior mobile developer focusing on android and ios**. I have developed many android and ios apps for Australian clients in various business domains. I also used to work a lot with telecom, video and location base services applications.

I am an experienced team player with clear communication and interpersonal skills who has the ability to work independently under pressure can lead, motivate and influence others and I have been using Scrum for more than 3 years so I know how to fit in a Scrum team.
