Nguyen Hien

NodeJS Developer

cptrodgers@gmail.com

Summary

+My github: https://github.com/cptrodgers.

+My Profile NodeJS VN : https://nodejs.vn/user/nguyen-hien

I'm a devloper about fullstack JavaScript. I really want know more in data analytics.

A member of Grokking Viet Nam in Grokbox.

Developing Open Source JavaScript in Github. Write some simple ebook in gitbook about my favorite.

Experience

Open Source Developer JavaScript (React, AngularJS, NodeJS) at GitHub

March 2017 - Present

Github - Dev open source

+ Develop seed architecture Redux React TypeScript (https://github.com/cptrodgers/redux-react-typescript).
 It's help developer React can save cost and time for research a seed for frontend of their project.

+ Build a simple example streaming video from browser with WebRTC + socket.io .

+ Build a module processing Vietnamese for query action (https://github.com/cptrodgers/vietnamese-query)

+ Buid success seed project for Meteor Architecture. It's simple and can update to micro services if you want
 scale app (https://github.com/cptrodgers/meteor-seed-architecture)

Senior NodeJS Developer at IMT Solutions

March 2017 - Present

At IMT-Solutions, i am senior NodeJS developer. I working in healthcare project called Famicare.

Skill using in project:

+ NodeJS + LoopBack in server side.

+ AngularJS 1 in client web side.

+ Nginx for proxy server.

Responsibilities :

+ Fix bug this project. Because Famicare project not working by another company building and i will fix bug
 for it to release on time.

+ Communication with my client and listen idea from him. After i suggest solution and finish problem.

+ Training for Fresher about Nodejs, AngularJS.

Leader Backend N.A.M Tech (A member of The Natives) at The Natives - We Create Brands That Sell

October 2016 - March 2017 (5 months)

+ Research and choose technical about web app + mobile app for projects of company.

+ Build and trainning team Fullstack Dev JS for company.

+ Recuit member for team.

+ Code fullstack projects of company.

+ Intergration API Paypal, Intercom, Yodlee, Stripe in projects.

+ Suggest solution for client of company.

**Some skill using in company:

+ NodeJS + TypeScript for Backend.

+ AngularJS (CMVP) for frontend.

+ Docker for deploy app + build CI fake (missing a hook for notification).

+ Domain Driven Design (DDD) for architecture of project.

+ Socket.io for integration chat in project.

+ Using Mongoose for Database MongoDB, SequelizeJS for MySQL database.

**Some projects:

+ Justdone App (Web App + Mobile App) : app.justdone.com.au.

This is a project about Finance of Bank in Australia. I integration more API using by service. Example :
Intercom for Email campaign, Yodlee for information finance, BurstSMS for sending SMS, Stripe for
payment and subscription.... More API of another service because client want more security for project.

+ Salesfit TV (Web App) : app.salesfit.tv (35.164.179.123)

This is project about marketing campaign. We can create a simple marketing campaign for your product.
Using Stripe for payment, BurstSMS for sending sms...
