- 2 years scholarship at FPT Aptech (but leave to learn BachViet college)

SUMMARY

I was born in 1989 and started working in 2009.

I am a responsible person, and also have ability in self study and research. In 4 working years I have absorbed very quickly, learned a lot about technology, mastering PHP, WordPress, Html slicing, Javascript. I always keep myself update for new web interface techniques such as mobile web development techniques, tablet with HTML5/CSS3, jQuery, Reponsive.
I also did to find friends who share the same passion for technology and enthusiasm. We share many common things and passion, so we decided to build up "Game and passion teams (http://gapt.vn)" to work together. I believe that the team has the ability to meet customer requirements for information technology especially web technology.
