WORK EXPERIENCE	
Project : **Anomo** **My role** : **Senior developer** **Technology: XMPP, Facebook SDK, Location Service, Google APIs…** **Company** : **Vinasource** http://www.vinasource.com/ - Link of the app on AppStore https://itunes.apple.com/us/app/anomo-meet-new-people/id529027583?mt=8 - There is a paper on Asian Weekly about Anomo http://www.nwasianweekly.com/2013/11/anomo-new-mobile-app-meeting-new-people-can-bigger-facebook/ - In Anomo, we are doing follow what Facebook does: Wall, Chat, Like/Unlike, Comment, Follow, Ice Breaker Game, Group Chat, Gift… - Some advanced technologies we've been using: Location service, XMPP, Facebook SDK, Game…some add-ons third party: New Relic, Apptentive, Flurry.. - We have > 50,000 users. - I joined the project at the beginning time and have been a key developer. We have 2 or 3 resource in this project. Now I also take a role to train some newbie to help them understand the architecture of the project and lead them in some new features.	From: **10/2012** To: **NOW**
Project : **Koala** **My role** : **Developer and Owner** **Technology: Peer to Peer, third party to edit images, Facebook SDK** **Company** : **Personal application** - Link of the app on AppStore https://itunes.apple.com/vn/app/koala-chat-new-nearby-friends/id736620023?mt=8 - I did this app for myself to sell on AppStore. Main Features: Group Chat (Peer to Peer), Edit photo, share images. - After iOS7.0 release, I see there are some interesting new features in SDK, so I'd like to learn it from practice. That's why I did this application as a case study. - We do support iPhone and iPad	From: **10/2013** To: **Now**
Project : **Where is my parking** **My role** : **Developer and Owner** **Technology: MKMapKit, Google APIs, Weather APIs, Facebook SDK** **Company** : **Personal application**	From: **11/2013** To: **Now**

WORK EXPERIENCE

- Link of the app on AppStore https://itunes.apple.com/vn/app/where-is-my-parking/id741536940?mt=8 - I did this app for myself to sell in AppStore. Main Features: Find the most convenience place for parking, Draw directions, view in 3D, screen shoot map, share to Facebook. - We do support iPhone and iPad	
Project : AVA dictionary **My role : Developer and Owner** **Technology: SQLite, Sliding, JavscriptWebBridge, UnZip file APIs** **Company : Freelance for Mana company** http://mana.vn/ - Link of the app on AppStore https://itunes.apple.com/vn/app/ava-tu-ien-anh-viet-viet-anh/id647566804?mt=8 - Main Features: Dictionary, Setting with Font and Theme - This app is an investigation about the integration between HTML at the UI and native Object-C in background. We render UI by HTML and Javascript, we call native function by using Javascript. It is a flexible way because we can load dynamic HTML and Javascript from our Server.	From: **10/2012** To: **7/2012**
Project : The Gioi Tin Tuc **My role : Developer and Owner** **Technology: WebView, HTTP Server for Caching, Sliding Menu** **Company : Freelance for Mana company** http://mana.vn/ - Link of the app on AppStore https://itunes.apple.com/vn/app/the-gioi-tin-tuc/id680986712?mt=8 - I did this app for myself to sell on AppStore. Main Features: Loading news from other Papers, Sliding to read news, Images, Videos from Youtube. - We cache date by using HTTP Server, at any request we save as a token with content of a file. If there is a new request, we get the file from Server and display it in the WebView in the meanwhile we do request to get the newest data then save to Server and reload the WebView if there is newest data.	From: **7/2012** To: **1/2012**
Project : Some PhoneGap apps **My role : Developer and Owner** **Technology: PhoneGap, PhoneGap plugins, Facebook SDK** **Company : Personal applications** - Link of the app on AppStore https://itunes.apple.com/vn/app/english-khmer/id541420892?mt=8 https://itunes.apple.com/vn/app/football-livescore/id541444125?mt=8	From: **9/2011** To: **1/2012**

WORK EXPERIENCE

- I did this app for myself to sell on AppStore. Main Features: Use PhoneGap to render UI, Load content of some WebSite and display into app, Use some native functions: share to Facebook, Email or SMS.

- We do support iPhone and iPad.
